A future for all places & territorial cohesion

#TerritorialAgenda

A future for all places

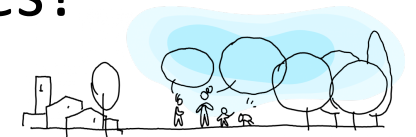

- Economic, social & territorial cohesion are objectives of the EU
- Territorial Agenda 2030
 - A future for all places & people
 - Just & Green Europe
- COVID-19 accelerates disparities between places & people

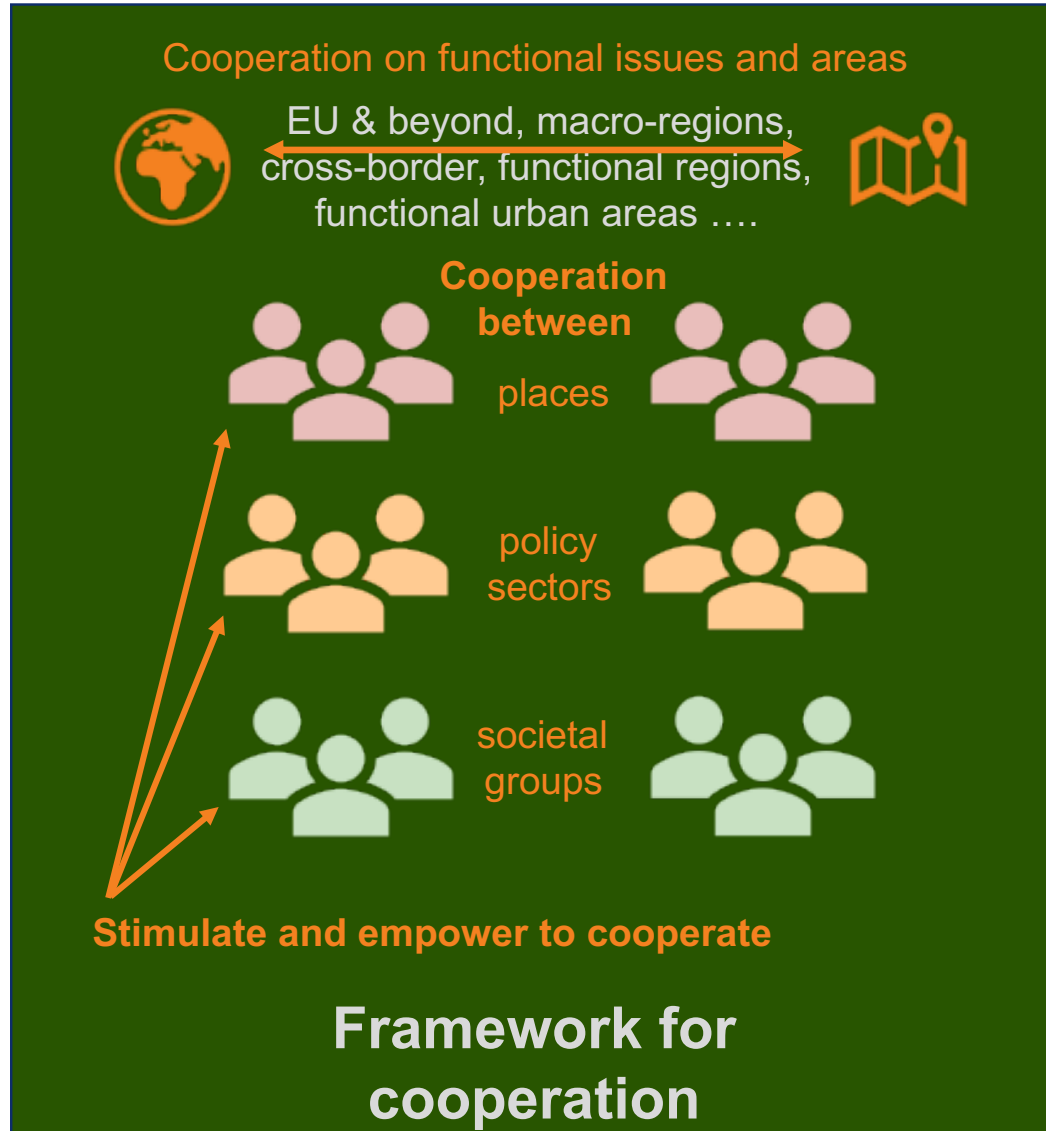

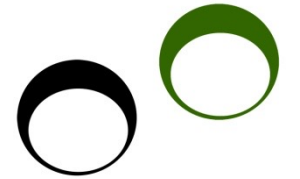

Broaden the debate

- Cohesion and a future for all places & people need action taken by
 - every player (public, private, civil society)
 - at any administrative level
 - of varying character
- Europe needs a broad societal debate
How do we picture ...
 - ... territorial cohesion?
 - ... a future for all places?

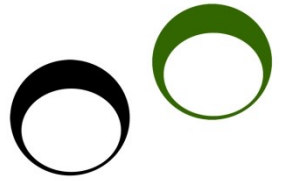

Cross-fertilisation fosters new ideas

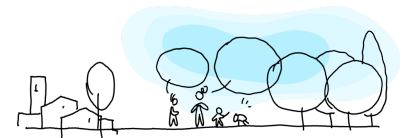

- Exchange of experience is important for spatial development
- So far, the focus is mainly on exchange between places
- Europe needs more cooperation between sectors and groups of society
- A future for all places
 - needs to build on action by all sectors, groups of societies ...
 - main policies and decisions are spatially blind

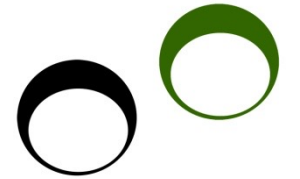

Dare more experiments

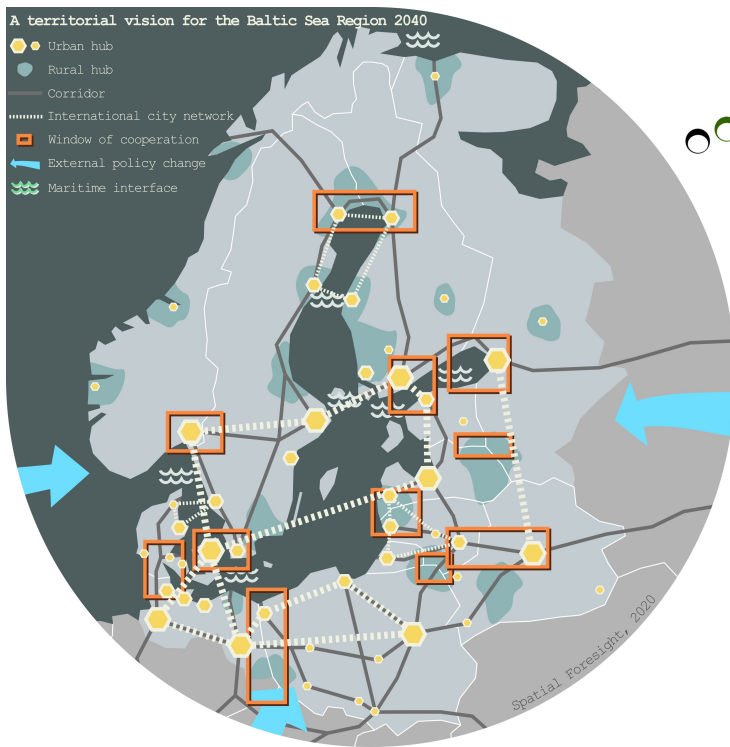

- To achieve territorial cohesion & future for all places
 - there is no blue-print
 - we need new ideas
 - we need creativity and co-creation
- Dare more experimentation
 - test new ideas
 - challenge result-oriented approaches
 - trial & error instead of playing safe

First baby steps

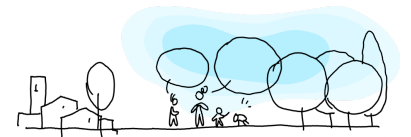

- Territorial Agenda 2030 pilot actions
 - Climate change adaptation and resilience through landscape transition
 - Small places matter
 - more at <https://territorialagenda.eu/actions.html>

○ VASAB

- Transnational vision for the Baltic Sea Region
- ... a future for all places?

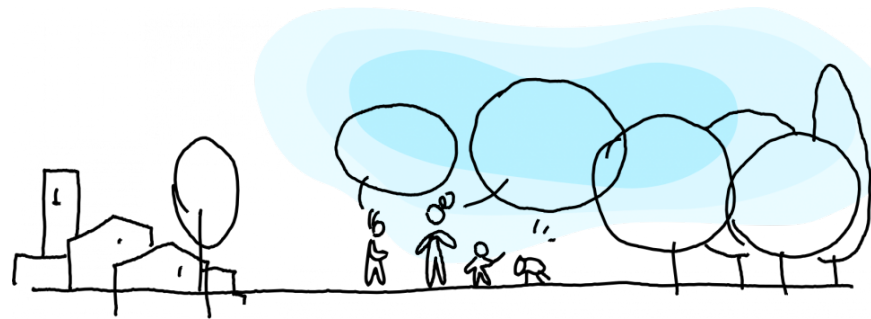

Thank you!

Cooperation only grows by sharing

You can only have more for yourself by giving it away to others
